

# Creating Currency Field In Price Object

To create fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Price) in quick find bar >> click on the object.
2. Now click on “Fields & Relationships” >> New.
3. Select Data type as “Currency” and click Next.

The screenshot shows the Salesforce Setup interface. At the top, there's a search bar and navigation tabs for Setup, Home, and Object Manager. The 'Object Manager' tab is selected, and the 'Price' object is chosen. The left sidebar shows a list of configuration options: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, and Record Types. The main area displays the 'Fields & Relationships' configuration for the 'Price' object. It includes fields for 'Field Label' (Gold price), 'Length' (8), 'Decimal Places' (0), 'Field Name' (Gold\_price), 'Description', and 'Help Text'. A note explains the length and decimal places: 'Please enter the length of the number and the number of decimal places. For example, a number with a length of 8 and 2 decimal places can accept values up to "12345678.90".' The 'Field Name' is auto-generated as 'Gold\_price'. Navigation buttons 'Previous', 'Next', and 'Cancel' are at the top right.

4. Enter Field Label as “Gold Price” and length as “8” and decimal 5. Field name will be auto generated.
5. Click Next >> Next >> Next >> Save .
